ICTs at Camille Saint Saëns are present through three interactive whiteboards and two wireless interactive tablets.

These devices are mainly used by history, geography and math teachers.

Sankore is a programme that can help developing their use.

You'll find (see below) a video to learn more about Sankore. Thanks to the link, it's possible to download the programme and join the shared pedagogical content team.

Sankore project An international project for ITCs software Vidéo chapitrée de quelques aspects de ce logiciel libre
